

I respectfully request that the Commission to adopt the rule changes contained in the petition re: RM-10786. Proficiency in Morse code is not conducive to the advancement of Amateur Radio, nor is it a given that a code proficient operator is any more likely to follow the regulations or promote good operating practices than an operator who does not choose to use that mode. My hope is that those operators who enjoy CW will continue to enjoy the spectrum they already have the allocation for, but that they will respect the wishes of those of us who do not wish to operate in this mode that we may continue to expand our knowledge, upgrade our licenses, promote goodwill amongst Amateur Radio enthusiasts worldwide, and advance the art of radio.
